## APPLICATION DEVELOPMENT, MAINTENANCE & RE-ENGINEERING

### ENABLING YOU TO GET BEST OUT OF OPEN SOURCE

Ray Business Technologies is developing applications using LAMP (Linux, Apache, MySQL and PHP) Architecture since 2006. PHP is considered as one of the most beneficial options to companies, when it comes to develop robust, dynamic and useful applications using open source technologies. Raybiztech efficiently utilizes the salient features of PHP to create high performance custom web applications that completely fulfill your web development needs so that you can augment your workplace or business practices.

- The open source nature makes easy to customize PHP web application development at affordable rates.
- PHP is highly flexible and extendible. This allows high degree of customization of web applications.
- PHP web application development is well supported by platforms such as Microsoft Windows, Linux, Mac OS X, etc.
- PHP offers highly stable and compatible programming environment that is conducive for robust, scalable and reliable custom PHP Application development.

Headquartered in Hyderabad, India, with offices in North America, UK and Middle East, Raybiztech provides cutting edge Open Source Solutions to leading global clients. Our sophisticated, high performance solutions together with our unparalleled expertise, drives our clients to becoming value-based, performance-focused organizations.

#### **.Dedicated Open Source R&D Team**

Raybiztech's dedicated Open Source R&D team is responsible for research and be on forefront on the latest releases, testing new technologies, and knowledge sharing with the rest of the company. Members of this group have attended numerous technical seminars organized by Open Source Teams, and possess years of expertise developing on this platform. The dedicated PHP development team enjoys the full support of various technology companies through our partnership program.

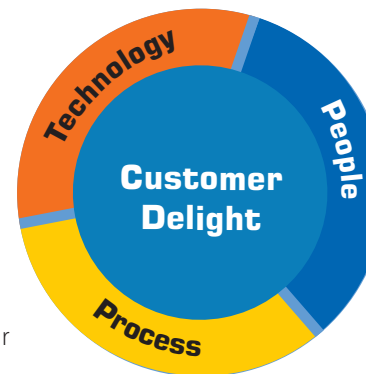

#### **Our Flexible Engagement Models**

##### **Hire Dedicated Developers**

Under this engagement model you can extend your staff to our development center by hiring the services of dedicated developers. You can start with a single developer and scale-up to a full-fledged project team. Engaging with us will help reduce administrative costs associated with hiring and training personnel yourself. You can concentrate on your core business and leave all the technology requirements to us.

##### **Fixed Cost Projects**

This engagement model is ideal for small or medium sized projects wherein the requirements are fixed and not likely to change during the development process. The engagement model is commonly used for projects wherein the end-user is the buyer of the product.
