## APPLICATION DEVELOPMENT, MAINTENANCE & RE-ENGINEERING SERVICES

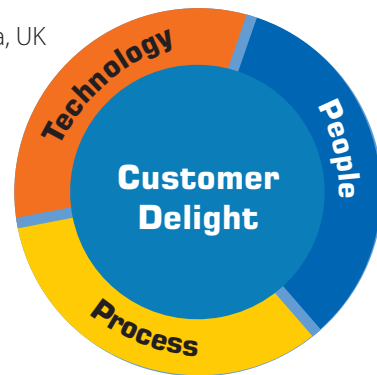

### OPTIMIZING THE VALUE OF INNOVATIVE TECHNOLOGIES

Ray Business Technologies is working in Microsoft .NET technology since 2007. We have extensive experience in .NET Development Technologies like ASP.Net, VB.Net and C#. Our early adaption of Microsoft Technologies and extensive experience, Raybiztech is an ideal technology partner to develop web applications as well as desktop applications using .NET Technologies.

We are Microsoft partner and our team remains updated with latest products and technologies available from Microsoft. Our experienced ASP.Net development team uses VB.net, C#, XML, WinForms, web services and SQL Server database to create powerful web and desktop applications that fit to your requirements and budget.

Headquartered in Hyderabad, India, with offices in North America, UK and Middle East, Raybiztech provides cutting edge Microsoft Solutions to leading global clients. Our sophisticated, high performance solutions together with our unparalleled expertise, drives our clients to becoming value-based, performance-focused organizations.

We specialize in customized solutions for various industries including Telecom, Manufacturing, Financial services, Insurance, Transportation, Healthcare, Legal and Power. We enable business to choose from among our diverse solutions and offerings and select the one that is absolutely perfect for your organization.

### Dedicated ASP.Net R&D Team

Raybiztech's dedicated Microsoft .NET R&D team is responsible for research to be the first on the latest software releases, testing new technologies, and knowledge sharing with the rest of the company. Members of this group have attended numerous technical seminars organized by Microsoft, and possess years of expertise developing on this platform.

The dedicated Microsoft .NET development team enjoys the full support of Microsoft through our partnership program.

### Our Flexible Engagement Models

#### Hire Dedicated Developers

Under this engagement model you can extend your staff to our development center by hiring the services of dedicated developers. You can start with a single developer and scale-up to a full-fledged project team. Engaging with us will help reduce administrative costs associated with hiring and training personnel yourself. You can concentrate on your core business and leave all the technology requirements to us.

## **Fixed Cost Projects**

This engagement model is ideal for small or medium sized projects wherein the requirements are fixed and not likely to change during the development process. The engagement model is commonly used for projects wherein the end-user is the buyer of the product.

## **We have vast experience in delivering**

- Corporate Intranets/Extranets
- Corporate Internet Portals
- Enterprise Content Management
- Document Management
- Customer Relationship Management
- Business Intelligence
- Internet B2B and B2C Portals
